

## ***How to make a sketchbook from 1 sheet of paper***

You will need:

1 sheet of plain paper (either A4 or A3 size)

A pair of scissors

*That's it!*

Fold the paper into 8 sections as shown and cut in the middle of the sheet across 2 Sections. Then fold lengthways in half and open out the centre by pushing the ends inwards. You will have 4 double sided pages which can be pressed together to make a book.
